Address:

**1801 NW Hwy 19N, Crystal River Mall, Crystal River**

Price:

**35.00 \$**

### Description

This is a 90 Min NRA seminar of most varieties of firearms: rifles, and pistols.

The seminar covers basics of firearm actions, terminology, parts, and ammunition, Firearm Safety, and needed accessories. You will learn what to expect, and what is needed for your first firearm purchase, and your first trip to the range. You will also learn how to move forward with different programs in the shooting community.

This will be all classroom and a non live fire class

If you're like millions of Americans, you've either recently purchased your first gun, or you're seriously thinking about it. Whether you have decided that you'd like to go to a range to try out a few different types of firearms to see what works best for you, or if you just want to properly develop your skills, you will find that proper training is the key to success, and while instruction from an NRA Certified Instructor should be the foundation of firearms training, a mentor can help you build on that training. Having assistance from someone you trust will help you take charge of your personal safety, in a safe, supportive environment.
